System Specifications

The memory is 100% compatible with this system:

System manufacturer	QNAP
Device type	Storage/NAS
Device family	NAS TS
Device series	TS-x85 Serie
Device name	TS-1685
Maximum memory*	128GB
Number of memory sockets	4
Annotation	You can use either UDIMM or RDIMM memories. These two different technologies can not be operated together in the system.

* The specifications for the maximum memory upgrade may differ from those of the manufacturer QNAP. Often the information given in the manual for the maximum memory upgrade is not up to date. New memory technologies, bios updates or newer software versions often allow the use of memory modules with a higher capacity than specified by the manufacturer with the same performance and stability.
